

# BAKEWELL DEFIBRILLATORS

Bakewell has nine defibrillators for public use when someone may be having a heart attack (cardiac arrest).

**Your first action must be to phone 999 or 112 urgently.  
Ask for an ambulance to attend.**

Give the location of the heart attack victim. If no definite address is available use the app "what3words" to identify the location.

Ask for the nearest defibrillator and its access code (if it has one).

Take the defibrillator to the victim as quickly as possible. Follow the simple spoken instructions from the equipment and give CPR (or ask others to do it) until someone qualified to help arrives.

## 1. Moorhall General Stores
